Having a problem with Windows 7 and IE 8

After installing Tendersystem OS on a hostgator account I get a error from IE not letting me login

1. from the tendersystem login screen I input the correct credentials for login and press Login then get a error from IE "Internet Explorer has modified this page to help prevent cross-site scripting. Click here for more information..." #

2. I have tried logging in from three different windows 7 machines with IE 8 and get the same error. I can't login

3. The versions of IE 8 are fresh installs no modifications
one machine is a x32 bit system and a x32 Laptop and a x64 bit machine.

4. Trendsystem OS is hosted on a hostgator account with the following:

Apache:2.2.14

CentOS:

cPanel:11.24.5-STABLE

Curl:7.12.1

MySQL5.1.30

phpMyAdmin2.11.9.5

Python:2.4.3ProgramVersion

Perl:5.8.8

PHP:5.2.12

ionCube Loader:3.3.7

Zend Optimizer:3.3.9

Ruby:1.8.7

Rails:2.3.5

OpenSSL:0.9.8e-fips-rhel5

Thank you
